☒	☐	Data integrity ensures the data is consistent, complete, accurate, and has been validated.
☐	☒	Data is available to individuals authorized to access it.

Recommendations : There are few security controls that need to be set in place to help improve Botium Toy's security posture and to help the confidentiality of sensitive information to ensure the longevity of the company. Here is a list of things that further need worked on and/or added least Privilege, disaster recovery plans, password policies, separation of duties, an IDS, ongoing legacy system management, encryption, and a password management system.

Now as far as for the compliance issue, Botium Toys must implement controls such as separation of duties, encryption, and least privilege. To improve its security posture, the company should duly classify its assets this will help identify and implement the controls needed to secure sensitive information.
